

SPECTRACAL C6

ADVANCED COLOR MEASUREMENT DEVICE

Accurate luminance and chromaticity readings for any display type.

Precise Accuracy

Advanced filters provide unparalleled accuracy for the price point.

Accelerated Speed

Unique firmware provides exceptionally fast readings when used with CalMAN.

Increased Lifespan

Sealed optics and sensors ensure accuracy and reduce drifting over time.

Easy Automation

Seamless integration with CalMAN software provides fast and easy automation.

Advanced Handling

Excellent low-light handling for detailed black-level calibrations.

Convenient Versatility

Includes built-in ambient light diffuser as well as tripod extension hardware.

Advanced Technology

Complete spectral characterization provides precise measurement tables for any current or future display technologies, including OLED and GB-R LED.

NIST Certified

Every C6 colorimeter receives a National Institute of Standards and Technologies (NIST) certificate of accuracy in SpectraCal's calibration lab prior to shipping.

Field-Upgradeable

Calibration tables and supported display technologies are automatically updated when the C6 colorimeter connects with CalMAN software.

MSRP \$695 FOR HARDWARE ONLY
