<http://www.spectracal.com/forum/viewforum.php?f=97>

Note: If you don't yet have access to the DPG-2000 forum page, email forums@spectracal.com to request this access privilege to be added to your forum login.

CalMAN IR Controller Device Driver

1. Download the [CalMAN Device Driver Pack](#) (or on the Downloads page at www.spectracal.com). Run the file to install the Device Driver Pack on your system.
2. Plug the CalMAN IR Controller into a USB port on your system. Windows should auto-install the device driver.

Older versions of Windows will pop up a Found New Hardware Wizard. At the prompt "What do you want the Wizard to do," select the option "Install from a list or specific location." Use the *Browse* button to locate the directory where you installed the Device Driver Kit.

The default driver file locations are:

32-bit PC - C:\Program Files\SpectraCal\Drivers\USB-UIRT.

64-bit PC - C:\Program Files (x86)\SpectraCal\Drivers\USB-UIRT.

3. If the drivers do not auto-install, open Windows *Device Manager*. Find your device in the list. Your device should be listed with a yellow exclamation point on its icon. Right click on the device and select *Update Driver Software*. Select *Search My Computer For Driver Software*, then follow the directions for installing the driver, as listed above.

SpectraCal DPG-2000 Initial Setup

1. Insert the supplied USB flash drive into the rear USB port on the DPG-2000.
2. Connect the DPG-2000 power. Plug the power supply into the DPG-2000 and connect the supply to AC power.

3. Connect the DPG-2000 HDMI output to your display input.
